DENTAL EXCELLENCE

IBUR BioSystems

Offers simple, yet comprehensive surgical planning systems to evaluate, prepare and place implants in their ideal locations from an anatomical and final restorative standpoint. Our patented and patent pending technologies create various types of innovative surgical guides that are designed to improve the accuracy and ease to use. With a choice of virtual surgical planning support, implant surgical planning is easier than ever, allowing the doctor to quickly and accurately diagnose, plan a treatment and execute the surgery in a cost efficient manner without any initial investment or software learning.

We also provide a hybrid anatomical diagnostic models created from the combined multiple data files of the dental cast surface data, study model or diagnostic wax-up information, and cone beam imaging data for further case evaluation or communication purposes. We designed our products with the detailed features to increase the accuracy of data collecting process and maximize the accuracy of the surgery while cutting down the surgical time.

Herring's Dental Laboratory

Gary Herring CDT

At Herring's Dental Laboratory our goal is excellence. Cultivating relationships with our dental teams and patients creates open communication. Our mission is effective and productive working relationships in order to deliver high quality removable prosthetics.

Gary's career began in 1973; he relocated to UNC School of Dentistry in 1977, where he earned his CDT. He worked closely with instructors in clinical settings, and also worked with students in the lab to help them have a better understanding of the laboratory aspect of removable. Gary returned to Fayetteville, North Carolina in 1980 to establish Herring's Dental Laboratory. Our commitment to quality & education is a primary focus. Partnerships with general dentists, periodontists, and oral surgeons are vital. With over 40 years of experience in removable prosthetics, Gary's chairside communication with the teams has resulted in positive outcomes for both the doctors and patients. The end results are often life changing.
